

DFS 900 Diesel Fuel Service

- Versatile connects to all diesel systems
- No spill or mixing system
- Easy to use
- Quick to hook up
- Hoses with quick couplers & fittings
- Comprehensive adapter kit

The DFS 900 is designed to clean the fuel system on diesel engines without mechanical strip-down of the injectors or the pump. Performing a diesel fuel system flush is easier than ever. A cleaning fluid is circulated through the fuel system while the vehicle is running. This isolates the injector pump, lines and injectors, allowing the cleaning fuel to remove varnish, gum, carbon & other contaminants from the complete fuel system and combustion chamber. This service will restore the vehicle's performance, fuel economy and reduce harmful exhaust emissions.

Technical Data

- ◆ 12 volt D.C.
- ◆ 2 lit/qt tank
- ◆ 5 micron filter
- ◆ Pressure regulator
- ◆ Compact design 38" x 19" x 15"
- ◆ Operations manual with full explanation of service procedures
