

FSE 130 Dual Fuel System & Emission Service

KENVO TECHNOLOGY INC.

Features:

- Cleans deposits from intake valves, fuel injectors & combustion chambers
- Restores lost power
- Improves fuel economy
- Operates on shop air
- No aerosol cans required
- Application time is minimal
- Comes with 1-#7051 S-Hook for spraying the product
- 2 Canisters - one for servicing the injectors and one for servicing the intake and intake valves . Running both canisters at the same time, saving time.

FSE 130 Dual applies cleaner as an atomized mist. This provides a more even distribution of the cleaner to all intake runners and valves as well as the combustion chamber.
